Baofeng K6 Tri-Band Radio - New in Box \$24.00

Powerful Tri-Band Transmission: Boasts a 5W power output, supporting tri-band transmission and multi-band reception across a wide frequency range, including VHF, UHF, FM, Airband, 1.25M, 1M, and NOAA. Whether navigating urban areas or remote terrains, the K6 ensures clear and reliable communication. FCC ID: 2AJGM-NAK6

Effortless Keypad Programming: The one-key freq copy function allows you to quickly team up with your fellows, while the one-key freq reverse feature easily switches your K6 from a repeater transmitter to a receiver. The intuitive

alphanumeric keypad enables easy frequency and text input, making it convenient to operate without a computer—especially outdoors. [Chirp Choose Model: K6]

Customizable Scanning and Monitoring: Tailor your communication needs with customizable scan ranges and three distinct monitoring modes. Whether you're on patrol or managing a team, these features offer the flexibility to adjust your scanning and monitoring preferences, ensuring you never miss critical transmissions

Large Battery Capacity: Equipped with a 2600mAh battery and offers dual charging options via Type-C port and desktop charger. This combination ensures extended usage time and convenient recharging, keeping you powered through long periods of operation

Personalized User Settings: Tailor your K6 with secure power-on passwords and customizable boot-up display text. Two programmable side keys provide quick access to essential functions, enhancing convenience and user control. The TX forbid function prevents accidental transmissions when using it as a scanner.

Radioddity GA-510 - New in Box \$38.00

➤ UP TO 8 MILES RANGE: A further and more impressive communication range comes from the 10W high power feature. The Radioddity GA-510 can be set in 3 power modes (high/medium/low) (10W, 5W, 1W) to give you the best talking quality under different circumstances.

➤ MANUAL PROGRAMMING: Radioddity GA-510 supports full manual programming. You can directly add or delete any preset channel on the radio itself. PC programming is no longer a necessity, but is still an option.

➤ 96 HOURS BATTERY LIFE: Due to two 2200mAh high-capacity batteries this radio has a continuous working time of 12 hours under 10W (high) power mode, 24 hours life under 5W/1W (med/low) power mode and 96 hours on standby.

➤ DUAL BAND, DUAL WATCH, DUAL DISPLAY: The Radioddity GA-510 is a dual band radio with both UHF and VHF modes. You can set 2 frequencies or channels on the same screen and receive 2 signals at the same time.
